Before Sharing

- Files; open just as you would to view it on your screen,
- Images; open in your picture viewer so it is full screen.
- Slide shows; open full screen in you video player and **pause at start**
- **It is best to do this prior to joining your Zoom session.**

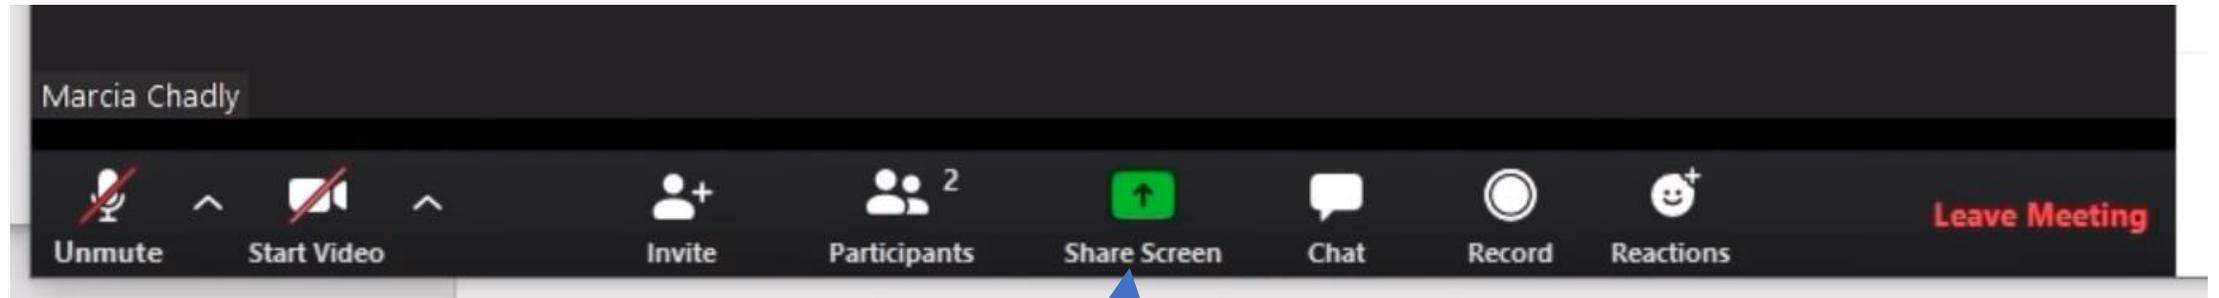

In Windows you will see a blue line under the open files.
In Apple you will see tabs across the top of your screen.

A Video ready to share

Note the play button is highlighted ready to play

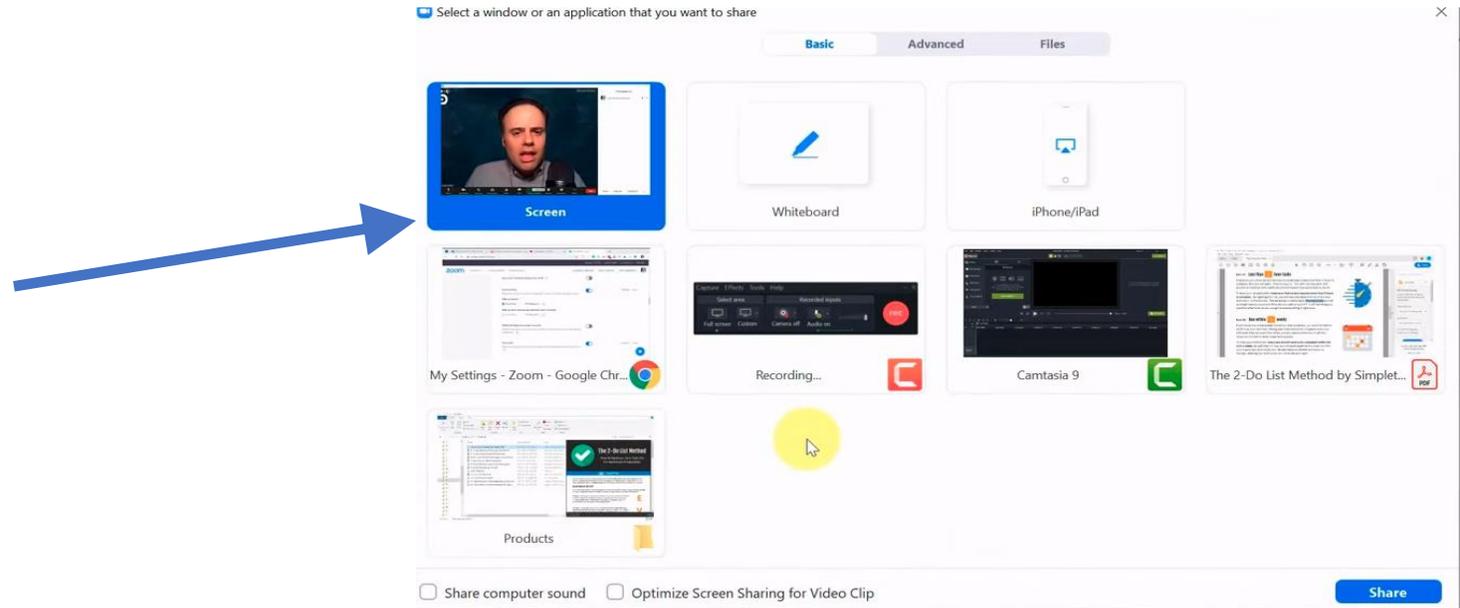

To initiate Share screen

Click on the green Share Screen button, then follow the steps below

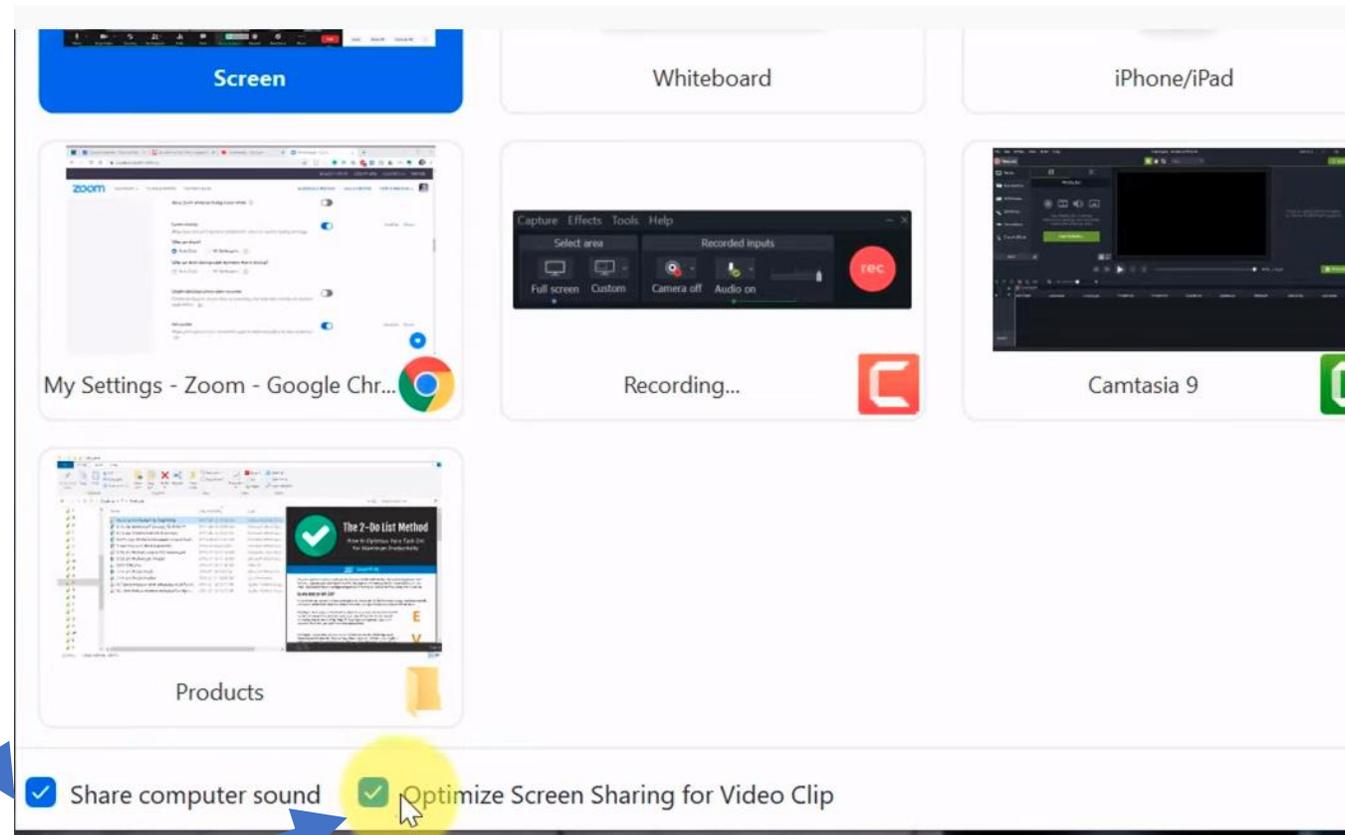

Share window step I

Click the green share button and this window will open showing which files you have open. Click on the one you want to share and it will be highlighted in blue.

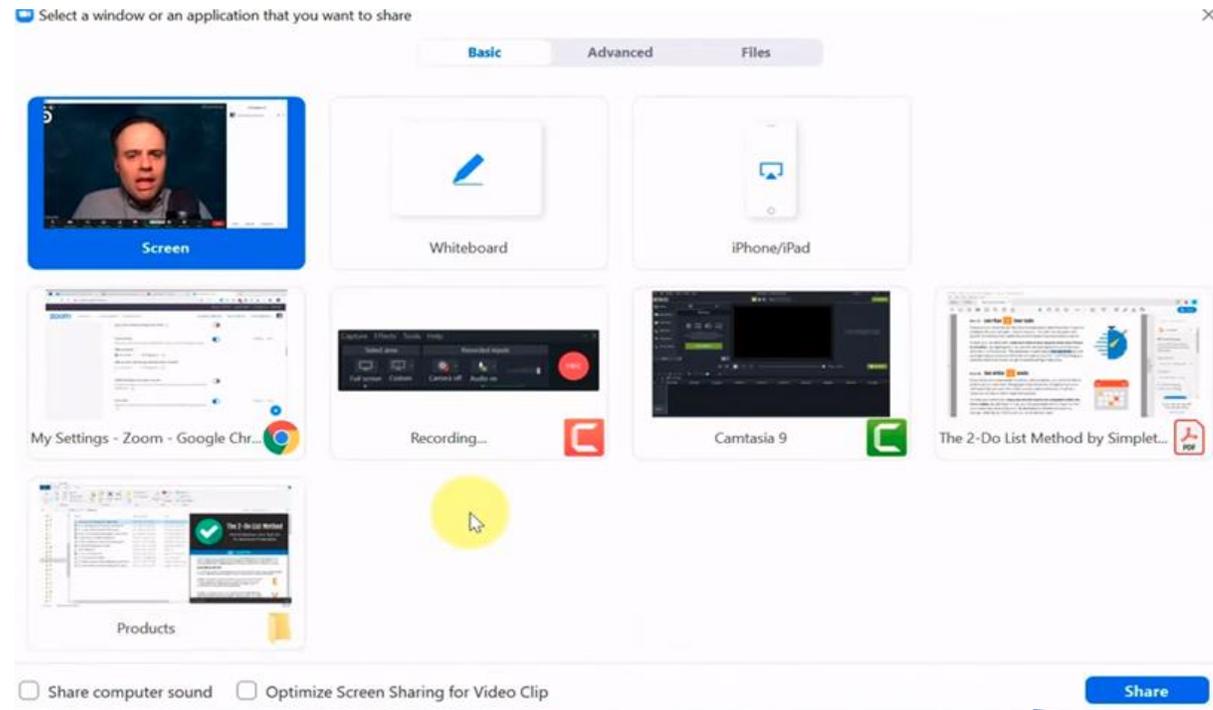

Share window step 2

Share computer sound should also highlight in blue when you select optimise screen

Click on “optimise screen sharing for video”
This should also select “share computer sound”

Share window step 3

Click share window then press play on your video

Note

This window may appear if your internet speed is too slow
