

YOUTUBE

Download YouTube Videos

Copy the URL (web address) of the YouTube video and paste it to this page -

<http://en.savefrom.net/> - then click the arrow, then select the format you would like the downloaded video to be. The download will start almost immediately. Note that 720p videos will be much larger files than smaller formats.

Alternatively, when you are on the YouTube page where your video is playing, pause the video, then add "ss" to the URL just in front of "youtube" - i.e. if the URL of the YouTube video is "https://www.youtube.com/watch?v=4vGcH0Bk3hg" change it to "https://www.**ss**youtube.com/watch?v=4vGcH0Bk3hg" and hit enter. It will take you to the same website above without the need to copy and paste the URL.

Rip Music from YouTube Videos

Copy the URL (web address) of the YouTube video and paste it to this page -

<http://www.youtube-mp3.org/> - then hit the "Convert Video" button. The conversion will take place very quickly, then you click on "Download" and the music file will be downloaded to your computer. It is as simple as that, and there are absolutely no nasties on this site!
